# Hydraulic Presses

## Deep Drawing Hydraulic Presses

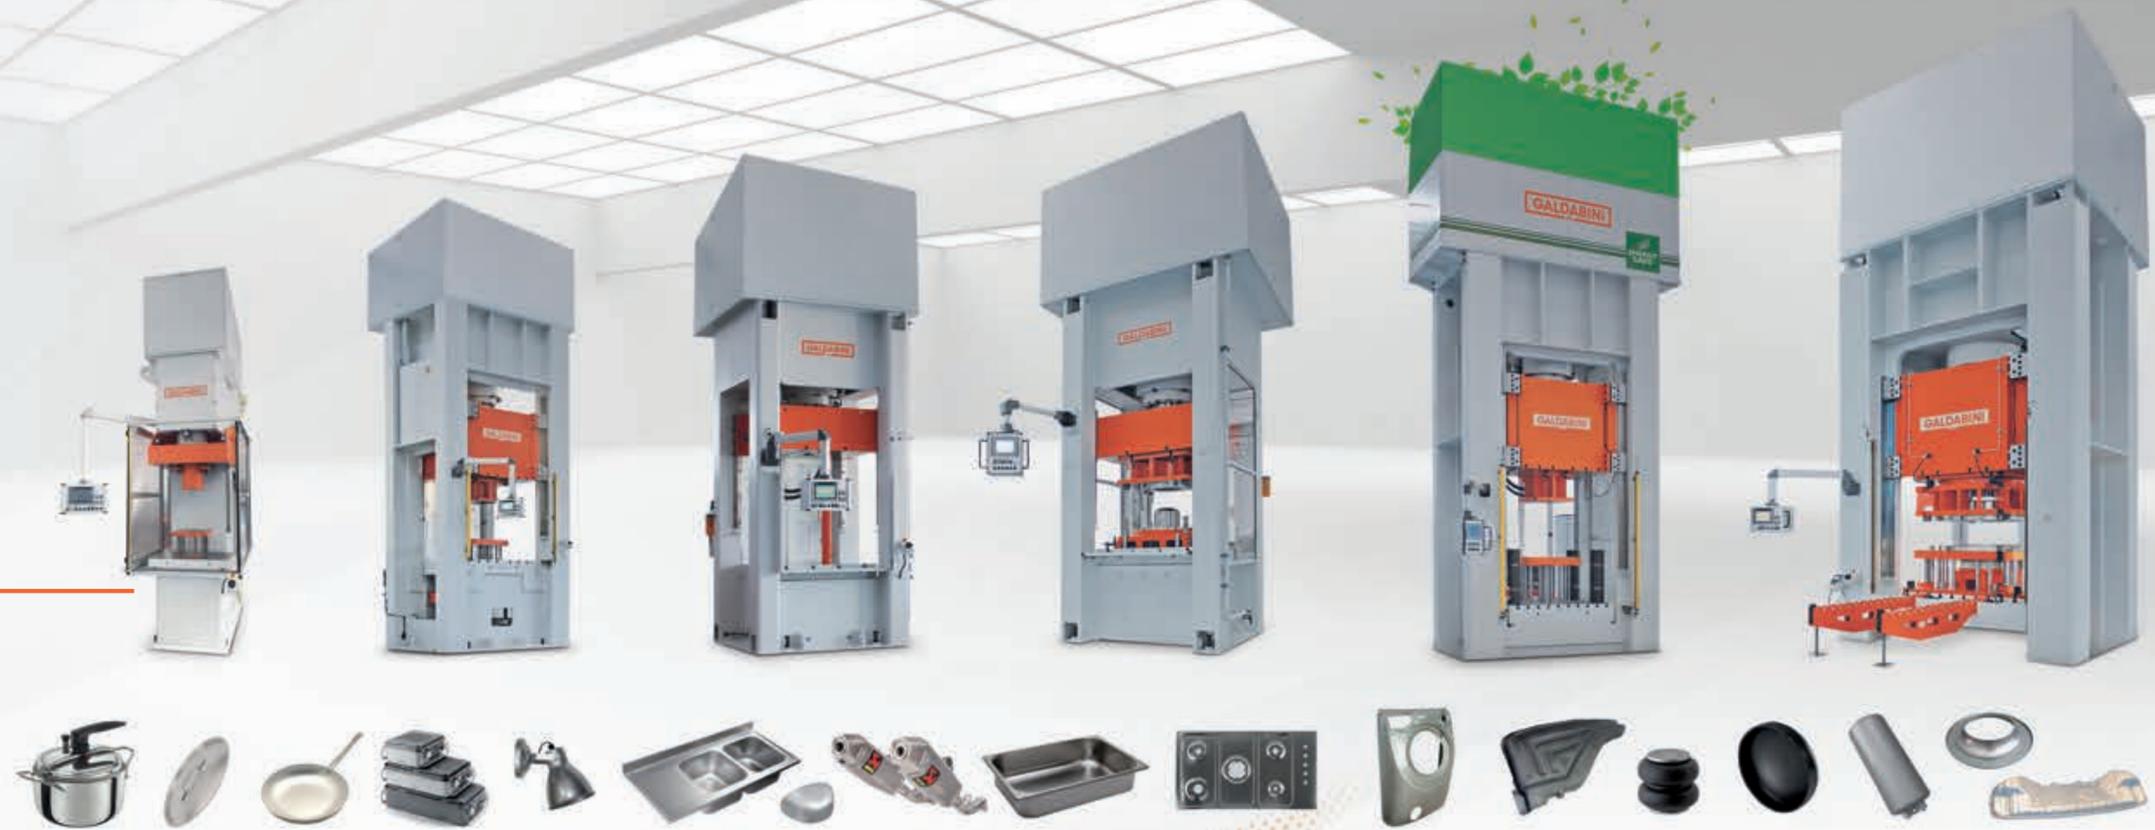

Our hydraulic presses are able to achieve the highest levels of productivity, quality and accuracy in the processing of products of different shape and sizes

» from 700 to 20.000 kN

Galdabini provides a wide range of presses, different for force, table size, strokes and functions able to satisfy all customer needs. Turn-key drawing lines can be carried out

A unique concept for saving up to 48%

## Automatic Lines

Complete automatic lines with decoilers, transfers, robots, dies and complementary machines are part of our offer

Based on several presses, several operations can be done: blanking, deep-drawing, restiking, calibrating, coining, punching and trimming

## Multi Press

High volumes and extreme flexibility are satisfied by top performing lines based by multi-slide presses: compact solution to perform in one machine up to six different operations. From coil to finished parts in less than 5 seconds

Fully automatic and extra-fast complete changeover can be done in less than 20 minutes

# Our Heritage and Certifications

We invest more than 7% of our turnover in R&D and believe that innovative design and pioneering solutions make the difference as demonstrated from our heritage since 1890

## Why Galdabini?

For us, innovation means new solutions that meet new requirements and needs

This is accomplished through more effective machines, processes, services, technologies and ideas that are all readily available to satisfy customers' requirements and industries

Moreover, we are manufacturer of straightening and drilling machines and materials testing machines. We have established internally, starting from the '80, an official calibration laboratory to offer the highest calibration services to customers
